

IN THE SPECIFICATION:

Please amend the specification as follows:

Paragraph beginning on page 6, at prenumbered line 14, has been amended as follows:

Referring to Fig. 2, a tubular substrate 10 is selected. Then the surface of the substrate 10 is wrapped with a fiberglass fabric 20 drenched with epoxy (resin) by way of rolling or fitting to form a bottom layer.

Paragraph beginning on page 9, at prenumbered line 16, has been amended as follows:

After the wrapping body 40 is hardened and patterned, the outer face of the wrapping body is painted with epoxy (resin). The resin can be painted onto the wrapping body or the wrapping body can be dipped into the resin, whereby the resin can attach to the surface of the wrapping body.
